

AXIS BANK – UniPG 2.0

UniPG is Axis Bank's payment gateway solution that offers multiple payment options and various value-added features, all with a single integration.

Integration for website and mobile application

Customized checkout page

Real-time gateway switch

Multiple reports and MIS available

Seamless payment experience

Real-time analytics

Check transaction status and perform data analytics on real-time basis

Autofill OTP on mobile

With our featherlight SDKs, customers need not enter OTP manually

Optimized for bank pages

All compulsory re-direction is handled in a second window with one click retry

Work across devices

From large screens to small phones, Checkout works across all platforms

No annoying redirects

Start and end payments on the same page without re-directing to 3rd party pages

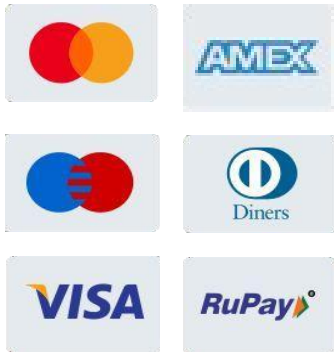

Great user experience

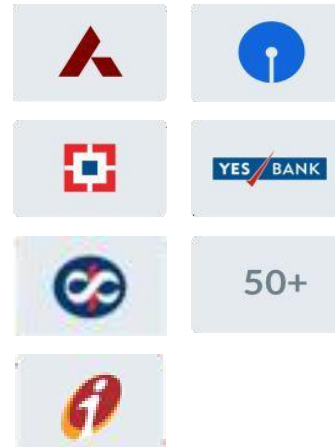

Handles all validations on payment input to reduce failures

Payment Modes Supported

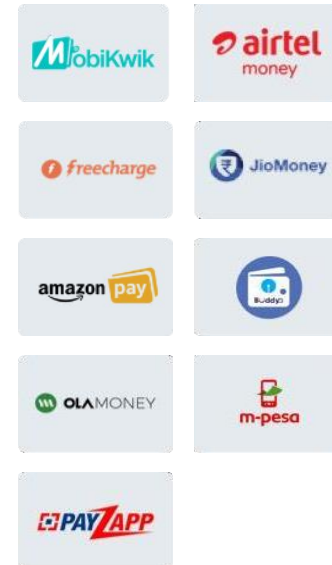

Debit / Credit Cards

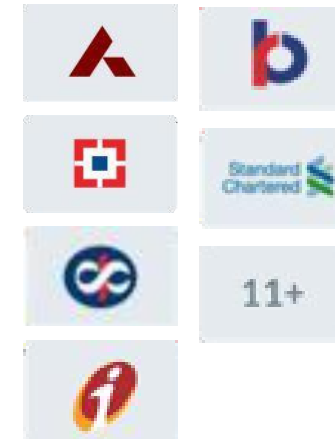

Internet Banking

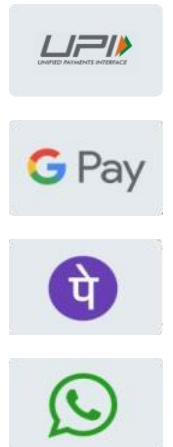

Wallets

EMI

UPI

Additional Payment Features Supported

E-Mandate

Enable recurring payments on Net Banking for specified or a range of amount, over a specific tenure and interval

TPV on Net banking and UPI

TPV of bank accounts is a mandatory requirement for merchants in the BFSI sector dealing with securities, broking and Mutual Funds.

Instant refunds

Process refunds to customers within 24 hours, thereby simplifying the process and reducing operational and support cost

Pay later

Process BNPL and cardless EMI transactions through PayLater, SIMPL, Zest Money, etc.

UniPG

Multi Account Settlement

Receive payouts for the full amount in a linked account or split the payment amount and receive settlements in multiple linked accounts

Native OTP

Capture OTP on merchant page, no re-direction to bank's page. Offers better success rate.

Multi currency acceptance

Process transactions through major currencies - GBP, USD, EUR, AUD, etc.

Multi bank EMI

11+ banks available on Multi-bank EMI on Credit Cards. Merchants can also offer 'No Cost EMIs' on these banks' Credit Cards

Payment Pages

Build web-pages with customized content, ready-to-use templates, and social media, SMS & email sharing options to start accepting payments instantly.

Payment Buttons

Create a single line of code that can be embedded on the website or blog and be displayed as a button to start collecting payments from customers

Payment Links

Share payment link via an e-mail, SMS, messenger, chatbot, etc., and get paid immediately.

Smart Collect

Generate virtual bank accounts and virtual payment addresses (UPI IDs) on-demand and share the details with customers to accept payments via NEFT, RTGS, IMPS and UPI.

Subscriptions

Automate recurring billing payments making transactions easier and automatic for your customers. Reduce account receivables and collection expenses.

Invoice

Create and share customizable invoices with customers to collect payments online.

Offers

Attract more customers and improve sales by creating and providing discounts or cashbacks on your website or apps.

Link based payment solution without any requirement of technical integration or presence of website.
